With FastFontPreview, you can view fonts installed on your system, create new ones and improve the look and readability of your document files. The advanced font previewer allows you to easily filter by font family, weight, size and more, quickly locate required typefaces, print all characters and create beautiful font-based documents. What's in FastFontPreview? The most useful tools for examining installed fonts are a font previewer, a character map and an example sample of all uppercase and lowercase letters, numbers and symbols. You can either filter the fonts by font family, typeface weight, size or file extension. To view all available fonts, use the tool's integrated filter. The default directory contains Fonts subfolder with the sample text. To search for fonts installed on your system, use the integrated search feature and filter according to all available parameters. After you select a font, a rich information bar is displayed on the preview window, providing all the font properties at once. To learn about the selected font, click its sample icon. The sample text opens in your default application. There's also an option to save the created font to your system, so it can be used immediately. After selecting a font, you can immediately print its character map, and create documents with the same style. You can set your own font-based document settings, such as paper size, text and background color. Saving the font to your system will make the newly created document the default font. What's missing from FastFontPreview? Currently, FastFontPreview doesn't support installing fonts. FastFontPreview, a software utility designed to help you view fonts and install new ones, is the latest free tool we've come across. It has a straightforward interface and provides a basic set of features, but a number of advanced options would be welcome. If you'd like to take a look at a free and quick-to-use font viewer, you may find FastFontPreview is the perfect choice. FastFontPreview has been tested and confirmed to work on Windows 7, Windows 8 and Windows 10, 64-bit systems. After installation, you need to click one of the two shortcuts on your desktop. All the system fonts will then be displayed, and you will be able to access them like any other folder in Windows Explorer. The program won't bloat your system, and it doesn't require additional installation. If you want to make sure FastFontPreview works on your computer system before downloading, please
