History Autodesk AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. Before AutoCAD was introduced, most commercial CAD programs ran on mainframe computers or minicomputers, with each CAD operator (user) working at a separate graphics terminal. AutoCAD was developed by Curtis Worm, who had designed the predecessor to AutoCAD, designed during the early 1970s. The first company to adopt AutoCAD was a Brazilian steel manufacturer. In 1975, Worm developed the first CAD software for the Brazilian steel industry, which was the first step in the adoption of CAD by the construction industry. The first full-blown prototype of

software Vulnerability to alcohol-induced ataxia is independent of D2 dopamine receptor density. Recent evidence has suggested that the development of a chronic alcohol intake that results in tolerance or dependence is accompanied by alterations in D2 dopamine receptor density (refs 4, 6, 7). It is unclear, however, whether these changes are associated with altered sensitivity to alcohol-induced motor deficits. Therefore, the present study examined the effects of chronic alcohol treatment on the motor response to acute ethanol exposure in rats that had been either tolerant to or dependent upon ethanol. Although rats that had been chronically treated with ethanol and given a dose of ethanol that resulted in an ethanol-induced motor deficit in naive animals exhibited a shift in the dose-effect relationship of ethanol, ethanol-

dependent rats that were dosed with a sub-threshold dose of ethanol did not show a shift in the dose-effect relationship of ethanol. These data suggest that the induction of ethanol dependence does not alter the sensitivity to alcohol-induced motor deficits.

Therefore, tolerance and dependence appear to involve different mechanisms that do not appear to be related to alterations in D2 dopamine receptor density.

General Manager I spent one night at the Inn at
Mountain Village. The room was a little cramped but
had a comfortable bed. The bathroom was clean. My
only complaint was the quiet, when I opened the door
to go to the bathroom, I was very loud. It was nice to
be on the side of the mountain by a lake, but it was
hard to find. The area around the Inn was very hilly
and the roads were very rough. The Inn was very nicely
kept, but there was quite a bit of...More Thank Max D
