Video Gallery Builder allows you to create various types of video galleries and slide shows. Video Gallery Builder is not a typical Flash slideshow maker. It can not only create Flash slideshows and animations that are compatible with a variety of websites, but it can also create a wide

---

variety of photo and video slideshows that can be used for a variety of purposes.

Video Gallery Builder is ideal for creating professional looking image or video presentations that include a wide variety of photos, videos and other multimedia files. Video Gallery Builder has a series of features that make it a very intuitive and easy to

---

use application. The built-in drag and drop interface makes it easy to create and customize your slideshow as well as insert it into a website. With Video Gallery Builder you don't have to worry about having to edit the XML configuration files or any of the Flash code for your slideshow. You simply drag and drop the photos

---

you want, choose the layout, view the slideshow and then go ahead and publish it for others to see.

Video Gallery Builder provides the user with a series of great features that make it the perfect slideshow builder for anyone who wants to create a slideshow that is both professional and functional. Video Gallery

---

Builder Features: Preview  
the Slideshow in Your  
Browser Photo Gallery  
Builder has the ability to  
preview your slideshow in  
your browser. After you've  
created the slideshow,  
click the Download option  
on the top menu to  
download the slideshow to  
your computer. Drag and  
Drop Photos Photo Gallery  
Builder is a simple

---

application that allows you to drag and drop the photos and videos you want to include in your slideshow. Change The Layout By using the built-in Layout Editor, you can create your slideshow with great ease. After you've created the slideshow, click the Download option on the top menu to download the slideshow to

---

your computer. Choose the  
Layout By using the built-  
in Layout Editor, you can  
create your slideshow with  
great ease. After you've  
created the slideshow,  
click the Download option  
on the top menu to  
download the slideshow to  
your computer. Choose  
The Photo Size Choose the  
size for each photo you  
want to include in your

---

slideshow. You can choose the dimensions in inches and centimeters to make sure the photos look good and fit nicely into the slideshows. After you've created the slideshow, click the Download option on the top menu to download the slideshow to your computer. Tweening The Image After you've created the slideshow,

Photo Gallery Builder is a comprehensive application that allows you to create various types of animated photo galleries and slideshows that can then be inserted into websites. To be able to do this, you don't need to know any Flash coding or how to edit the XML configuration

---

file. You simply choose the type of gallery you want, provide the photos, adjust various settings and then click the publish button. Photo Gallery Builder makes the entire process straightforward and effortless. It displays a user-friendly interface which allows you to view and test out every layout so you can easily see how it

---

looks and feels. You can choose from a relatively large number of galleries that seem to fit almost any style of website. The application also enables you to customize the galleries in detail. Since each one is built in its own way, they offer you different settings you can change. Some of them are common and allow you to

---

set the size of the gallery, background color, image scaling mode, caption and translation animation speeds. Being able to make these customizations, you not only integrate the gallery better into the website, but you also get to make sure that the speed with which it functions does not affect the performance of the

---

website or browser. After the three simple steps are completed, publishing with Photo Gallery Builder is also a breeze. For each project you get to enter the HTML, gallery and config file names, as well as add a watermark. The gallery is exported in a place of your choosing along with all the files it needs to function properly. After the project

---

is exported, Photo Gallery Builder opens a browser window which lets you test out the slideshow and offers you instructions as to how you can add it to your website. In conclusion, if you're looking for a practical and efficient way of creating great looking image galleries for your website, Photo Gallery Builder is a

---

tool to be taken into serious consideration.

AutoPano Pro is a cross-platform panorama creator and editor for any camera.

---

Whether you are just starting out, or experienced photographer, AutoPano is a simple tool to manage your photos and create beautiful panoramas. Its intuitive interface is simple to use, and makes creating beautiful panoramas a snap! AutoPano Pro has the features you expect from a professional panorama editor.

---

Advanced operators include 5 point auto-straightening, custom scene location, rotation, and stretching modes, as well as beveling, perspective distortion, lens correction, and neutral density (ND) filter effects. You can create custom settings for each image in a panorama. Images can be numbered or textured and

---

can be used as backgrounds, or as layer masks. For best results, try using a tripod. Some of the features of AutoPano Pro:

- Create seamless panoramas, with no joins
- Capture scene by hand and accurately
- Set up your camera just right for perfect results

---
