KeyMacro is a kind of software that allows you to create macros or actions that will be activated by any key combination. In the same way as MS Office creates an action when pressing the ENTER key, KeyMacro does it. KeyMacro also adds an automatic action when you press CTRL, ALT and SHIFT keys. KeyMacro is very similar to AutoHotkey, but KeyMacro can be installed on any PC (not Windows only, as AutoHotkey is) and, in addition, does not require third-party installation. FEATURES: * simple to use (no learning curve required) * Can be used to create hotkeys for the Windows operating system as well as for the programs that you may use in your system * A shortcut to create macros (actions) and activate them with the keyboard combination you want * easy to use * user-friendly * no third party program required * can use Windows hotkeys, such as CTRL, ALT and SHIFT, to activate your macros * auto-close of files after opening them * a special collection for all the hotkeys (key combinations) you may have created * internal Hotkeys * Undo & Redo (create macro actions and it will go back, easily) * History (access to all your macros that you have made so far) * Filters * help (online) is found here: * logfile is found here: C:\Users\user\AppData\Roaming\Macromates\Logs\keymacro.log The MACRO files are installed into the Main folder: Main: *\Macros\ INDEXER is a free Windows application that helps you to make quick and accurate queries of textual information (e.g. list of words, words related to a certain topic). INDEXER is divided into two major parts: a Query editor and an Indexer. The Query editor consists of a list of queries that you may create or import from other applications (e.g. MS Office, Word). You may add a file or a folder as a source for queries. The Indexer uses the data from the queries, and it produces an index that is based on those queries. INDEXER also allows you to create custom queries. Main Features: * Customizable interface * Set, 77a5ca646e

technology can also be used to connect to networks. Bluetooth technology provides the following advantages: Bluetooth can be used for both connection and communication. Bluetooth can transfer large amounts of data quickly. Bluetooth can transfer data wirelessly between computers and other devices, even if there are obstacles such as metal.
